

Assorted Software

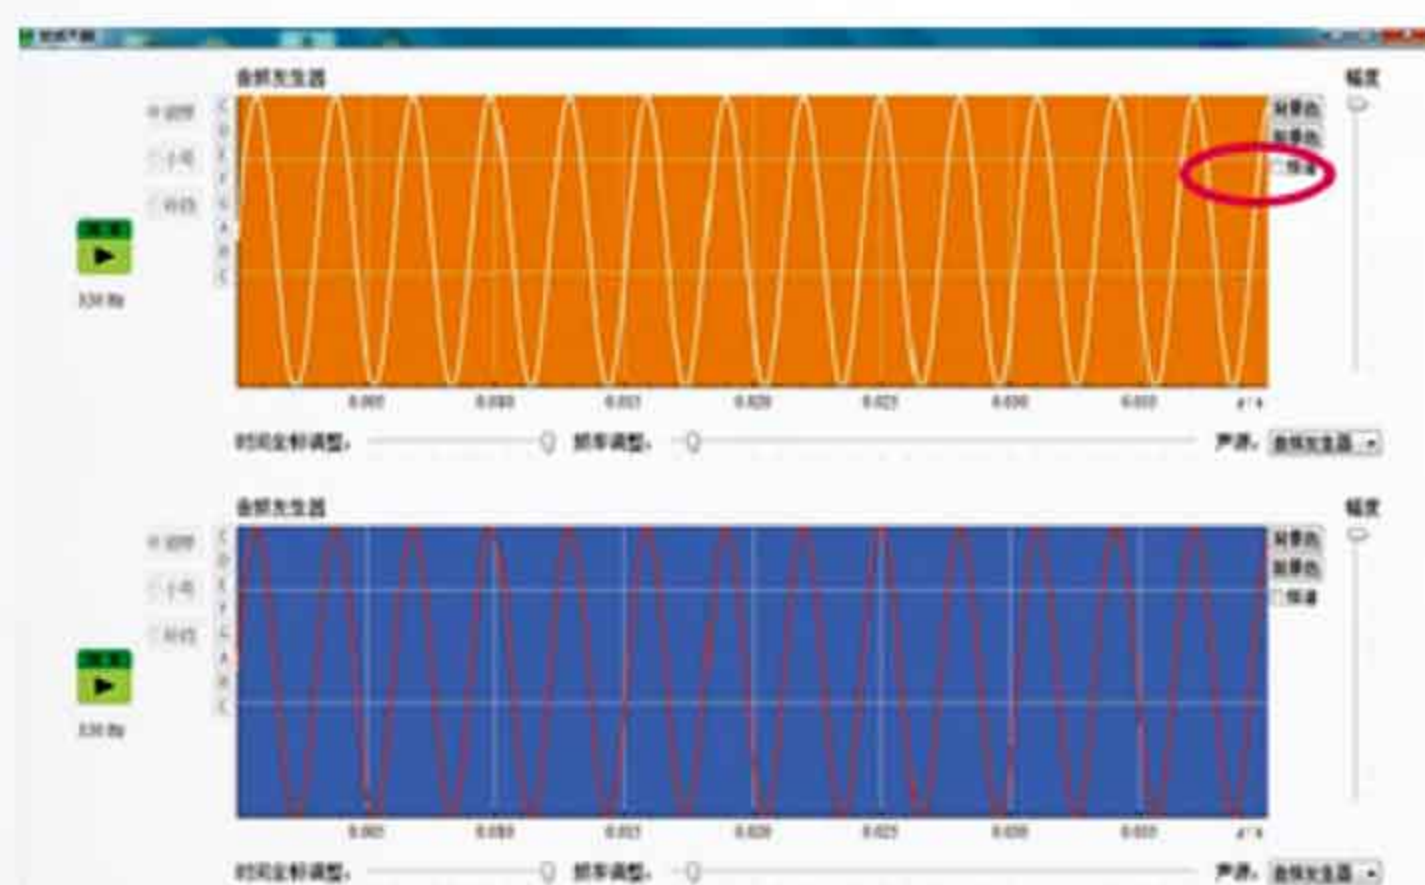

W01 Software Package
(General Edition)

CD Storage, Simplified Interface; automatically identify and operate by inserting sensor; real-time display experimental data or curve; with many analysis tool for experimental data; a variety of display modes: List of numbers, List of Analog, Oscilloscope.

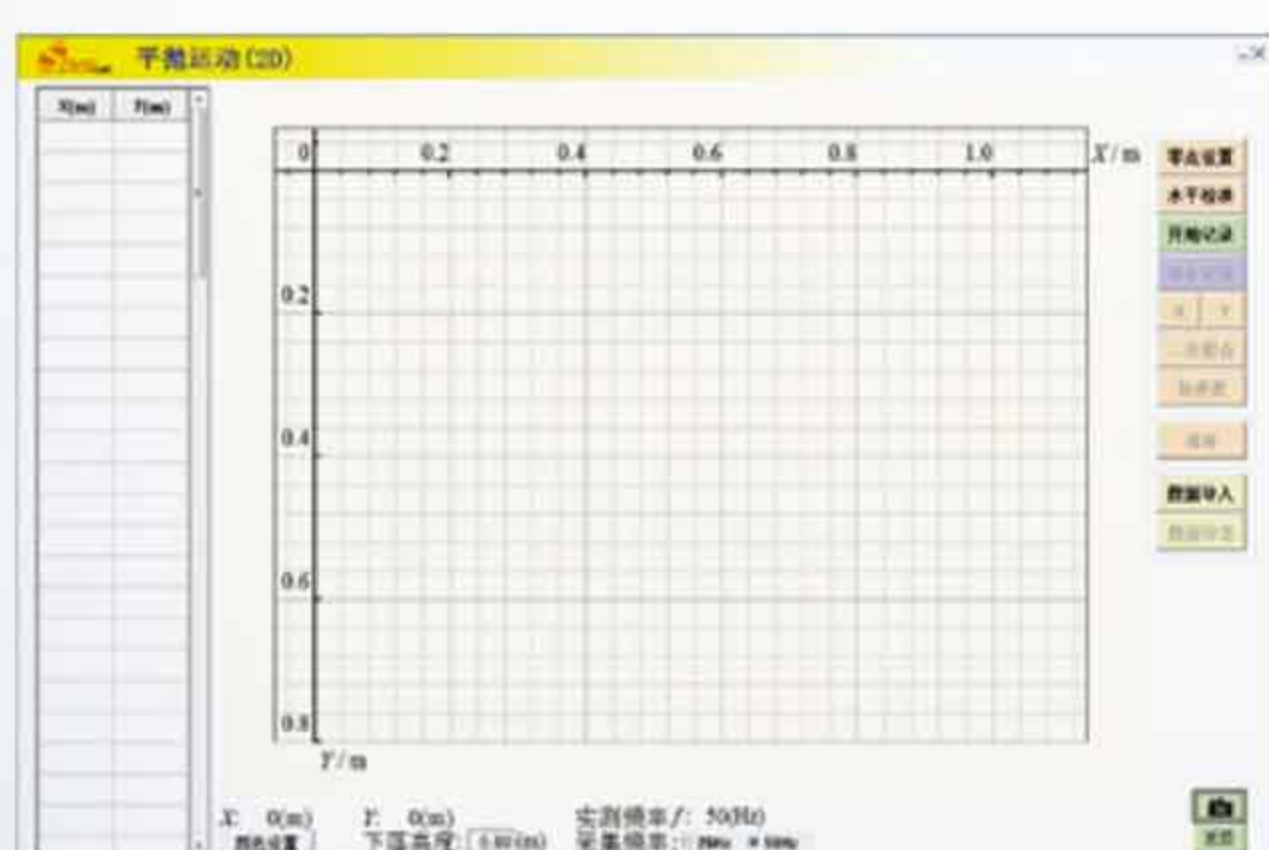

Note :

Due to keeping innovation,
the specification and
Machine pictures or color
are subject to alteration
without notice!

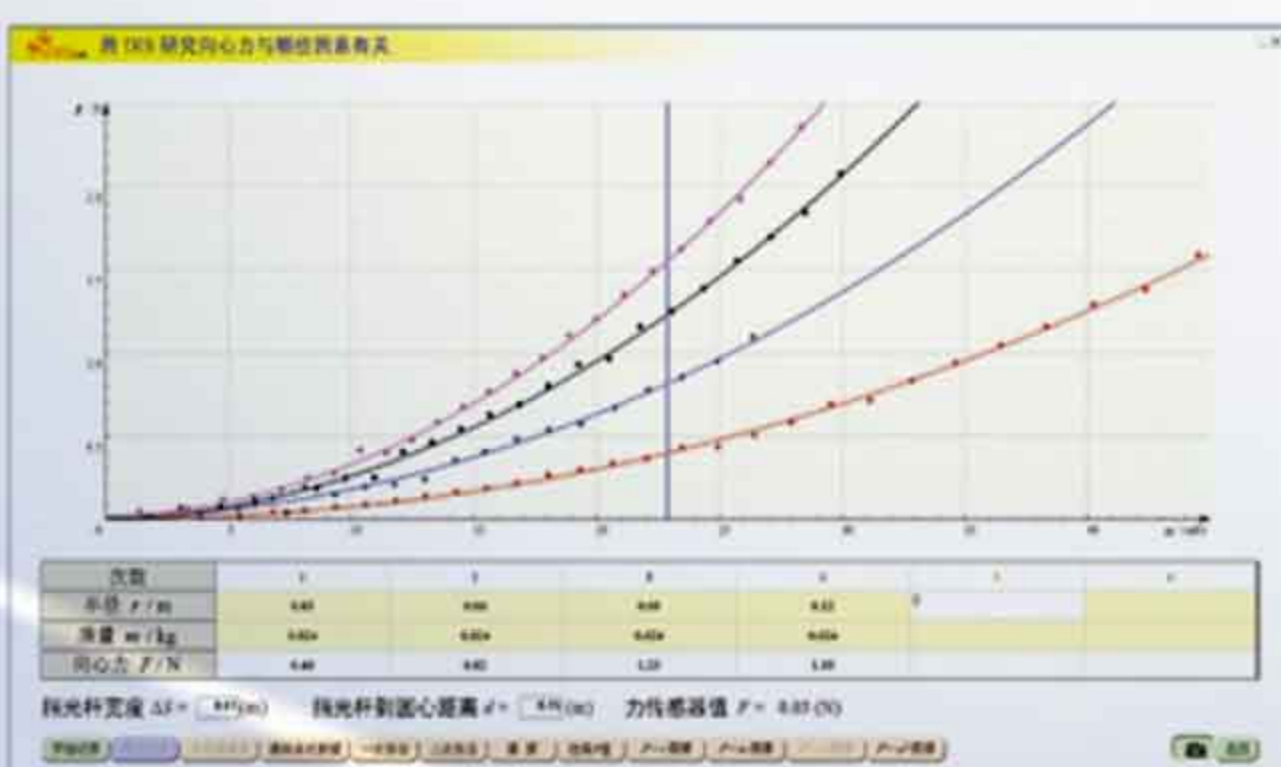

W02 Acoustics Software

It can collect and show sound wave , with a spectrum analysis function. It can be used in some acoustics experiments.

W03 Software Package
(2-D Motion System)

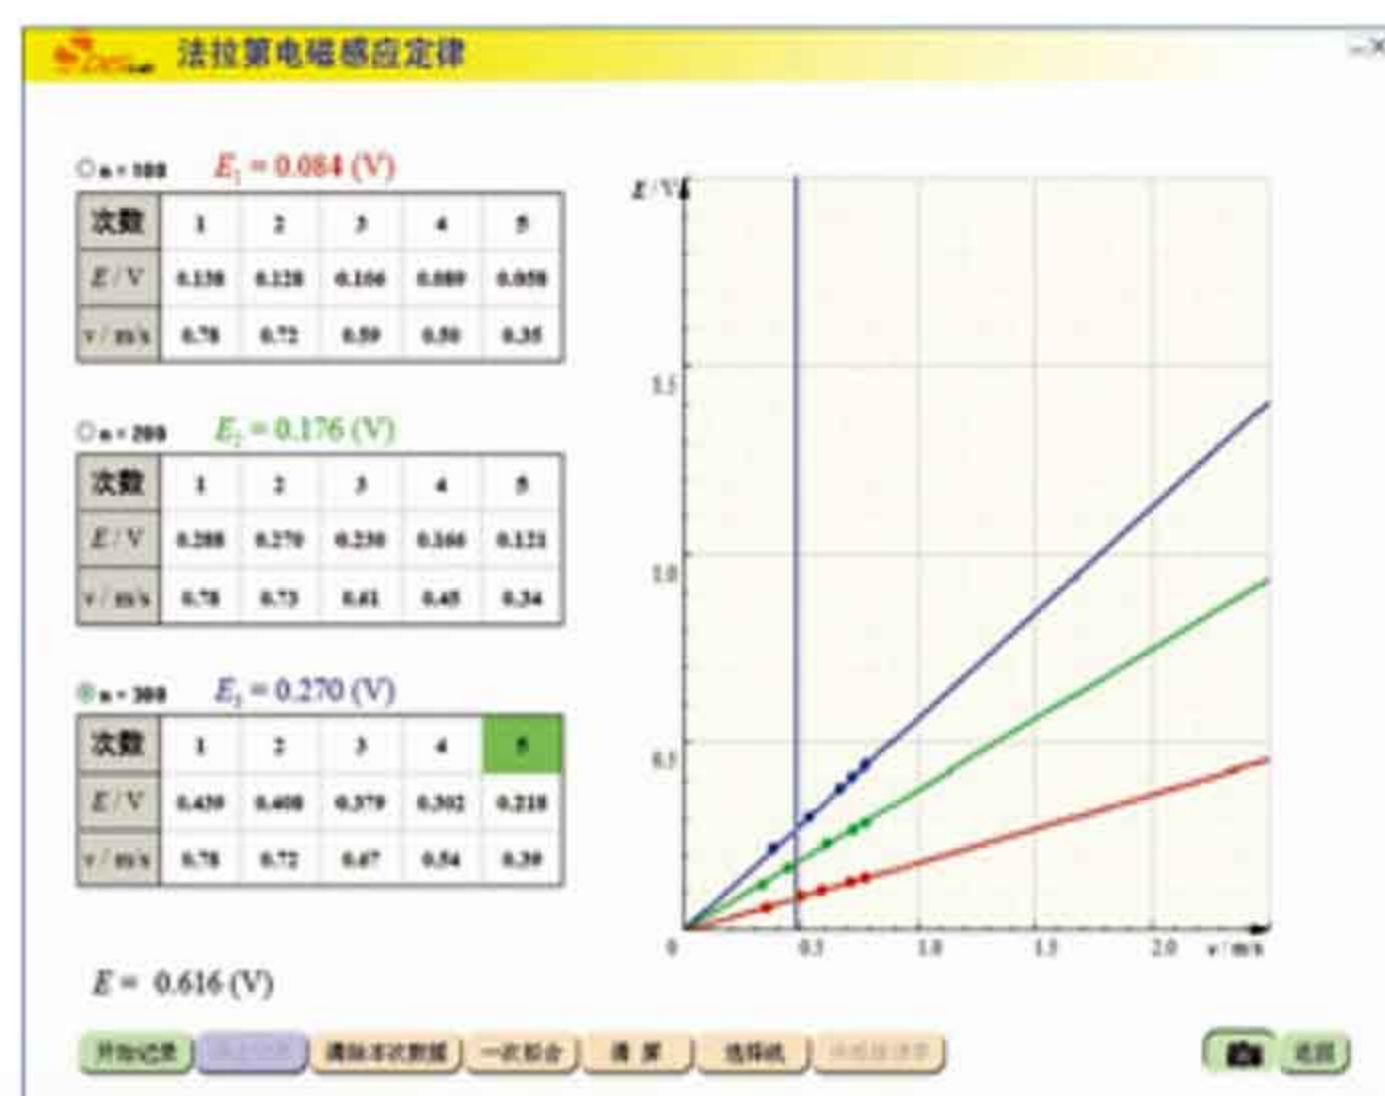

CD Storage, Support all 2-D motion experiments, including projectile motion, motion composition, simple pendulum, centrifugal track, uniform circular motion, mechanical energy conservation, Robot trajectory tracking and so on.

W04 Wireless Centripetal
Force Software

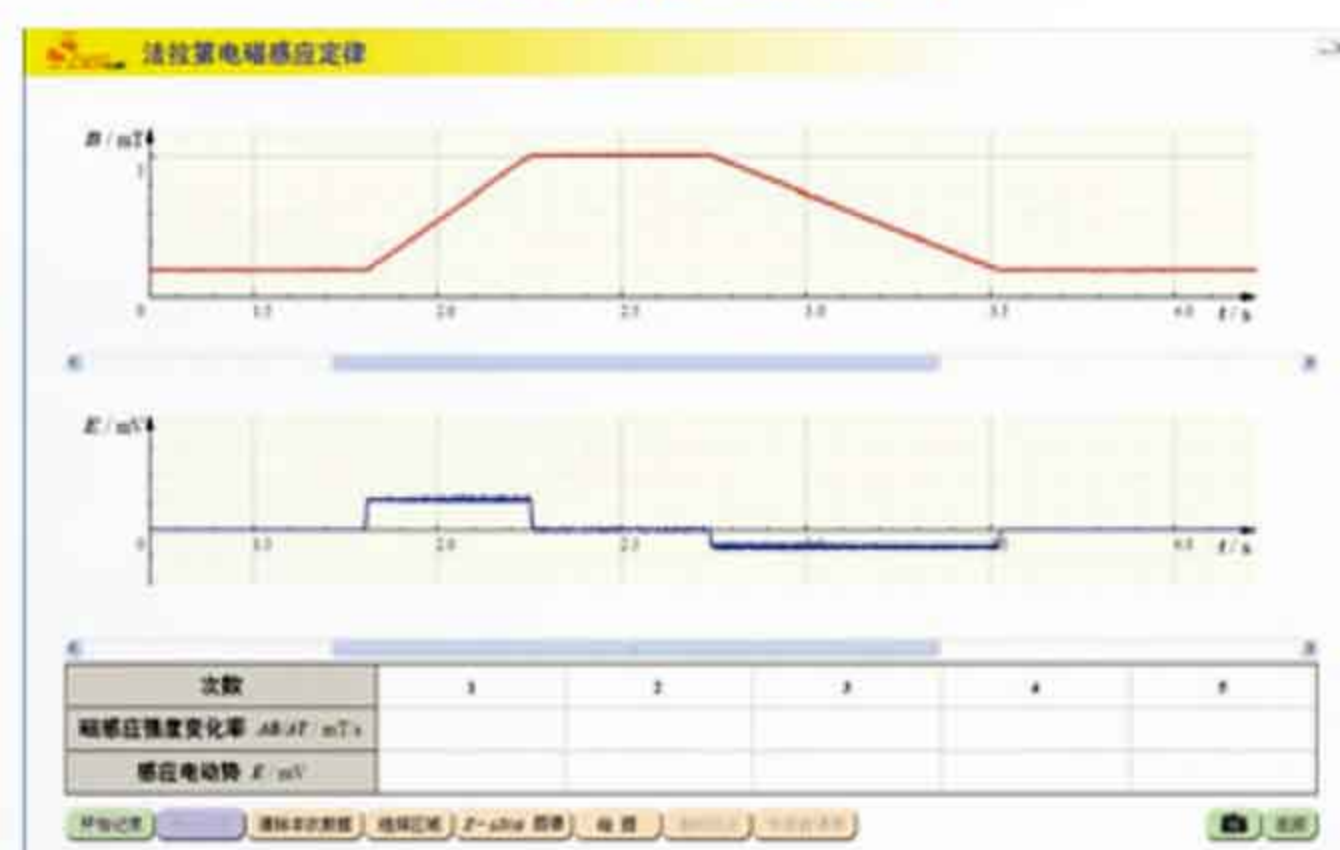

It is an independent software. It should be used with Wireless Centripetal Force Apparatus. With brief interface, operation method is as same as the General Edition Software.

Assorted Software

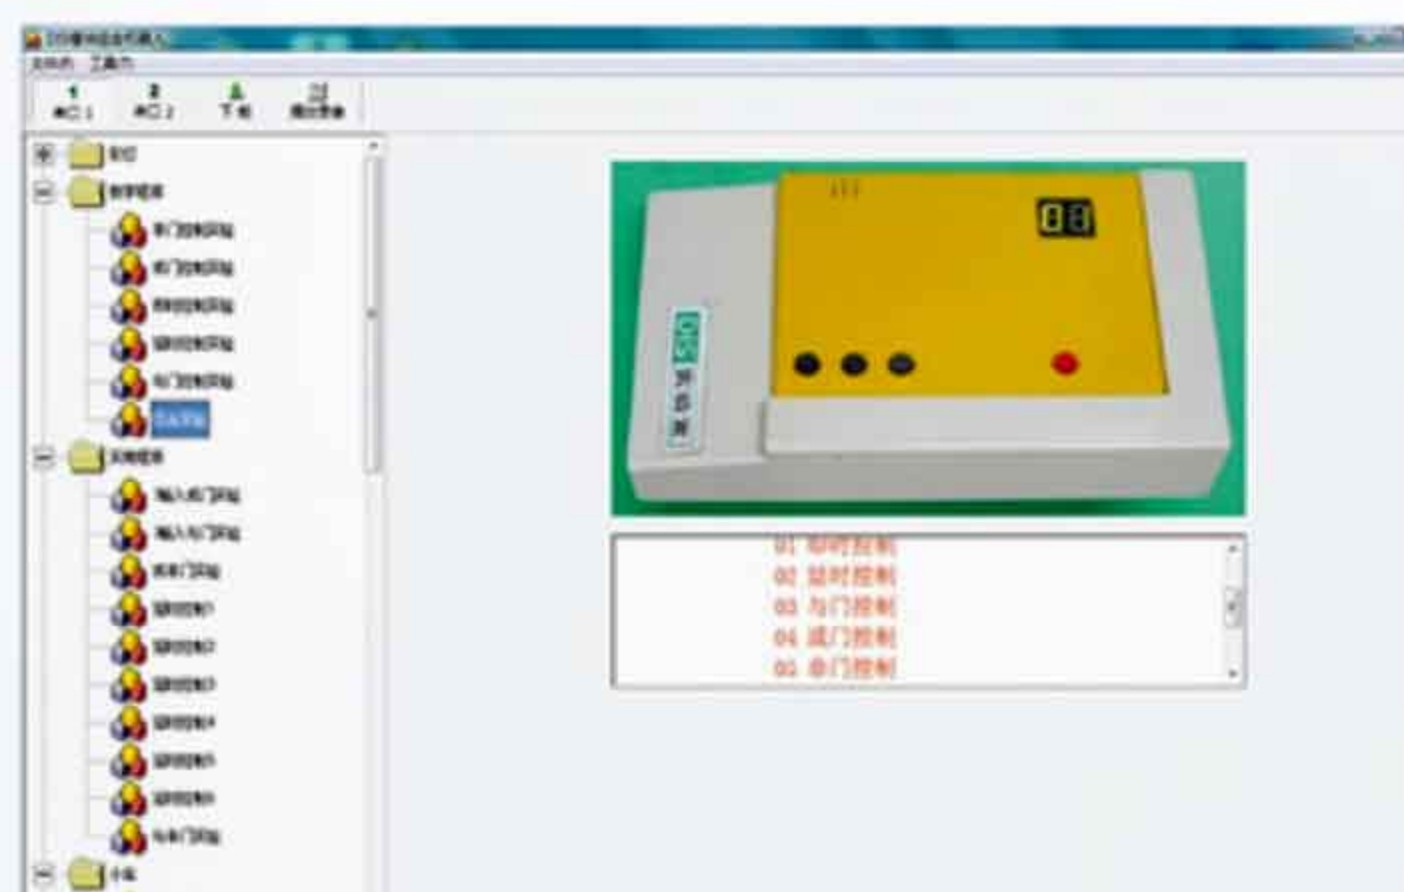

W05 Faraday's Law Software I

It is an independent software. It should be used with Faraday's Law I Apparatus. With brief interface, operation method is as same as the General Edition Software.

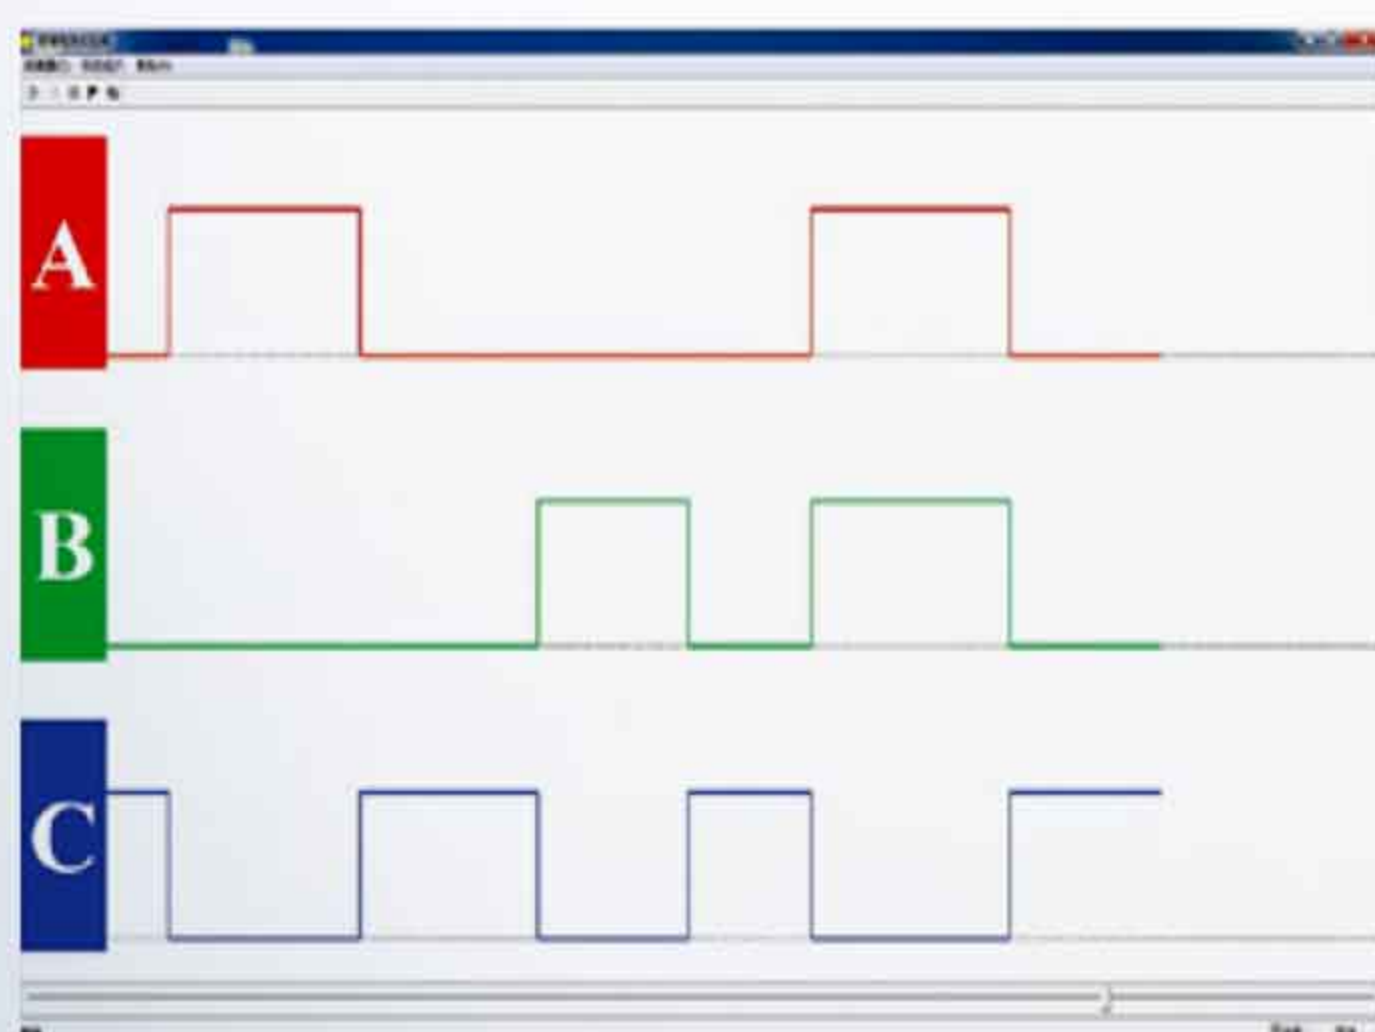

W06 Faraday's Law Software II

It is an independent software. It should be used with Faraday's Law II Apparatus. With brief interface, operation method is as same as the General Edition Software.

W07 Modular Robot V1.0 Software

It mainly adopts the modular structure, which include the "usage instruction", "common cases", "programm design".

W08 Logical Circuits V2.0A Software

It mainly adopts the similar style of General Edition Software. It include the menu bar, title bar, tool bar, window area and status bar.

Note :
