Technical Data

Reed width(mm):	1900, 2100, 2300, 2800, 3200, 3600, 3800, 4200, 4600
Speed	: 312r/min~430r/min
Filling rate	: Up to 1000m/min-1200 m/min
Power	: Overall electrical power consumption < 4KW
Noise	: <87dbA
Control	: Broken filling automatic stop, broken warp automatic stop
Beam	: Outside diameter Ø800 mm Ø1000 mm standard singel and double beam
cloth roller	: Max. rolling cloth diameter may reach Ø550 mm

YJ-II model flexibility rapier loom

Weaving high counts pure cotton, color-weaving flax, real silk, ramie and chemical fiber fabric.

YJ-CF woolen flyer frame

This machine is designed manufactured according to the requisition of technological transformation of the drap de berry companies, is the substitution product of H212 and H213 model wood weaving loom and may raise product quality and production efficiency of drap de berry apparently.

YJ-JF spinning type woolen loom

This machine equipped with side word jacquard device and folding side device to be used in weaving spinning wool fatxics.

YJ-TH model mechanical jacquard, electronic jacquard and trade mark loom

YJ-TH model mechanical jacquard, electronic jacquard and trade mark loom is used to weaving the fabric of complex pattern.
