DC-12 High speed automatic cup overlapping machine

Function and Use :

> **DC-12 High Speed Automatic Cup Overlapping machine** is an assistant cup overlapping fitting for cup making machine. It uses the machine transporting fitting and the structure of the cup transports the cup after being produced by the cup making machine to the appointed cup overlapping part to overlap the cups, the height of the cups being overlapped can be adjusted to control the number to the requirement. Using the machine can greatly reduce the laboring intensity of the worker, ensure the cleanness and tightness of the cups and solve the difficulty of separating the cups in the behind process, it is an ideal practical cup overlapping equipment.

Parameter	DC-12 (Mode)
Transporting speed (mm/s)	800
Transporting speed (mm/s)	≤120
Diameter of cup (mm)	≥60
Productive efficiency (pcs/h)	40000
Power supply (three phase)	220-380V 50-60Hz
Power of the whole machine (KW)	1.5
Size of shape (mm) (L x W x H)	4200x1200x1200
Weight of the whole machine (kg)	800
