without notice!

MAIN PARAMETERS:

This complete weighing & packaging line system is composed of a product feeder & Conveyor, a 10 head weigher, a support platform with staircase, a BH-600 VFFS machine, a discharge conveyor, a checkweigher & rotary collecting table.

The line features stainless steel versions of critical components and is ideally suitable for packing dry, non-fragile products into a wide range of pack styles, using many different kinds of wrapping materials.

The most suitable weighers and baggers will depend upon speed and pack style requirements, product characteristics and film specifications.

A Full Set Including:

Vibration feeder
Bucket conveyor (or L-shaped conveyor)
Multihead weigher
Platform & shelf
Vertical form fill seal machine
Output conveyor
Check weigher
Metal detector
Rotary collection table

Following devices are optional

Nitrogen flushing device
Hole punch device (round hole/Euro hole)
Polyethylene(PE) sealing system
Gusseted device
Product stopper
Vacuum bag device
Additional former
Tear notched

SPECIFICATION

Machine speed	20-60 bags per min (depend on Packaging machine)
Bag size	Max. 240 × 350 (L × W) mm
Bag style	Pillow, Gusseted, Hole, Standard...
Wrapping materials	Heat sealable film, such as PP, Pe...
Film reel dim.	Max. outer ϕ 450mm, Core ϕ 75mm
Film reel max weight	40kg
Packing accuracy	0.3-1.5g per bag
Packing capacity	10-3000g per bag
Operated languages	Chinese, English, etc
Machine finish	Stainless steel
