

Caking index tester

Product model : GM/NJ-2

Product code : 041601343

Application :

It is suitable for testing caking index and roga index of coking coal in laboratory of coal, metallurgy, coking and scientific research.

Advantage :

- Equipped with string device;
- Drum is driven by stepper motor, low noise, accurate number of revolution, good sealing;
- Number of revolution is adjustable as requested, the equipment can automatically shut down when regulated number of revolution is finished, it has the function of manual reset or automatically reset when boot, the instrument is high degree of automation.

Parameter :

- | | |
|--------------------------|-------------|
| • Number of revolution : | 50±0.2r/min |
| • Range of revolution : | 1-999r |
| • Motor power : | 120W |
| • Power supply : | 220±5V/50Hz |
