

Electric drying oven

Application:

This drier is mainly used for drying, heating and sterilization of non-volatile, non inflammable and non-explosive test materials, it also can be used for normal constant-temperature test work.

Advantage:

- Double over-temperature protection;
- Auxiliary heating device makes heating faster;
- Silicon controlled rectifier makes temperature controlling more accurate;
- Computer temperature controlling can set a certain time;
- Total electro-static coating surface makes good performance;
