

DWD-140 Straight Tube-free Dispensing system

Features :

1. Function of self calibration

Robotic arm and purpose-made calibration cup which make 4 balances self-calibrated.

2.Support dispensing recipe more than 140 solution cups

The software will remind you to put the additional cups by manual if over 140 cups are required.

3.Humanize management of solution

Remain solution will be auto-recorded accurately, order of priority of making solution can be known by software and with the function of "dye expiration reminders".

4.Modularization design

All of the robotic arm, rotary feeder and the dosage device are independent modularization, which of them can work separately while the other modularization being closed.

5.Robotic arm

New design of soft-chain, no injuries to the balance when put the solution bottle on it.

6.Stepping motor

Locate accurately and stop immediately when meeting troubles. No damage to the machine and no hurt to the operator.

7.Apply to dispense high viscosity liquid in printing industry

The adjustable caliber of dispensing head can accomplish high viscosity liquid.
