

PLANETARY BALL MILL

Product Description:

1. CE approved. The patented oil seal mute technology, PLC frequency conversion control, adopts the precision gear transmission designed by itself to replace the original belt transmission.
2. Two and four grinding jar can be taken at a time and simultaneously working with 2/3 capacity of jar , O-shaped sealed tank, safe operation and also pressure resistance.
3. It is suitable for dry/wet/vacuum/protective atmosphere/low.

temperature/high temperature grinding to ensure the homogeneity and repeatability of the experiment and solve the deposition and adhesion problems of some materials.

4. The equipment is equipped with a safety switch (automatically shut down when cover is opened) and a safety automatic gear lock. There are universal wheels to push and run, and the equipment is safe and stable for maximum continuous operating time (even more than 24 hours).
5. Low center of gravity, stable performance, compact structure, convenient operation, safe and reliable operation, low noise, no pollution.

CONTROL PANEL

The control panel has adjustment speed, grinding plan, start and stop emergency stop function, single and bi-direction with timing which can be adjusted according to your experimental requirements.

Complete grinding methods, including dry grinding, wet grinding, high temperature grinding, low temperature grinding, vacuum grinding, protective atmosphere grinding, and the discharge particle size can reach 0.1 μm .

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

FINE GRINDING
