

High Speed Full Automatic Rotary Labeling

RY-830W

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

Features

1. This machine is suitable for packaging drinking water, food and beverage, seasoning, cosmetics, medicine and other industries, and is specially used for round bottles, barrels, single side, front and rear symmetric paste, whole week paste and fixed positioning label. The Chinese-English Touch Control
2. The Chinese-English touch control operating system adopts the closed loop control of Siemens PLC and servo motor to ensure the operation of high-speed and stable labeling is easy to learn.
3. It adopts 750W high-power, high-torque and ultra-small inertia servo motor to send the bid, and the bid delivery speed can reach 60m/min.
4. The three-column design makes the bid delivery more stable, the 8-dimensional space adjustment more convenient, the three-stage spring clutch new tension control, the smooth running realizes the accurate bid delivery.
5. The rubber power rubber roller drive is combined with the star wheel turntable. Two products can be put in at the same time and labeled to improve the production efficiency.
6. It can be operated by single machine or connected with high-speed filling line to improve production efficiency and save production cost. It can also be specially designed according to user requirements.
