NP-LC Full automatic Linear Spindle capping machine The spindle capping machine is suitable for spindle screw caps, locked caps, and spray caps .lid caps and so on. The caps can be metal or plastic.

Features :

- We adopt the mode of one motor controls one capping wheel, which can ensure the machine to work stably and keep consistent torque under long term working condition.
- The clamping belts can be adjusted separately, which allow the machine to be suitable for capping bottles with various heights and shapes.
- If you choose the optional cap guiding system together with the machine, it will then also fit for pump caps.
- The convenient construction adjustment system is equipped with precise ruler and counter.
- The mainframe can be lifted and descended automatically by a motor.
- It is PLC control

Technical parameters

Model	Automatic Linear Spindle capping machine
Capacity	0~200 bottle/minute (subject to bottles and cap size)
Bottle and cap diameter	Φ 20~120mm
Bottle Height	40~460mm
Dimension	L.1060 * W.896 * H.1620mm
Voltage	AC 220V~50Hz
Power	1600W
Weight	500Kg
Cap Feed System	Elevator Feeder No need to change any molds with different size of caps
