

Water treated system

This part is used to treat the water you get under ground or other place, making it suitable for production of juice drink. To different condition of the source water, the system will be different too.

1. RO water treatment

Usage: reverse osmosis devise can remove more then 97% of deliquescent saline substance and 99% of colloid, microbe, particulate and organic substance in water. Due to its low energy consumption, easy operation and maintenance, output of high-quality water and bringing no pollution, this machine has become the best choice for producing pure water, super- pure water and even space water.

Assembly RO system 1ton/hour No.1-6

Treated water tank 1 m³

Main parameters:

No	Name	Description	1pc	Size/power	Remark
1	Water Boosting pump	CHL2-40	1pc	0.55kw	SUS304
2	Quartz - sand filter	SYS-2	1pc	Φ400×2300mm	SUS304
3	Active Carbon filter	GHT-2	1pc	Φ400×2300mm	SUS304
4	Dosing system	--	1set	--	
5	Precision filter	JML-2	1pc	Φ250×800mm	SUS304
6	One-stage RO system	RO-1000	1set	--	
7	UV sterilizer	UV-2	1pc	400×300×200mm	SUS304
8	Treated water tank	1m ³	1pc	Φ800×1500mm	SUS304
9	Pure water pump	CHL2-20	1pc	0.37kw	SUS304
10	Valve and pipe	--	1set	--	SUS304
