

JUICE DRINK MIXING SYSTEM

This system is used to mix water, sugar and other additives, turning them into energy drink and preparing it for filling.

1. Sugar melting pot

Usage: the sugar melting pot is used for melting the sugar into syrup through heating and stirring to meet the process requirement. It is widely used in production of fruit juice and carbonated drink.

Main parameter:

Model : HT-300
Quantity : 1 piece
Capacity : 300 kilograms one time
Diameter : 450mm
Height : 1000mm
Framework material : SUS304 Stainless steel

2. Syrup filter

Usage: the syrup filter is used for removing dreg from the syrup made by sugar melting pot. After the filtering the syrup becomes clear and pure. It's essential equipment for the fruit juice production.

Main parameters:

Model : TJL-500
Type : tube type
Quantity : 1 piece
Capacity : 500 kilograms one time
Framework material : Stainless steel

3. Mixing tank

Usage: the mixing tank is used for mixing water, fruit juice penetrate, and syrup together through stirring.

Main parameters:

Model : PL-500
Quantity : 1 piece
Capacity : 500 kilograms one piece one time
Diameter : 700mm
Height : 1800mm
Framework material : Stainless steel 304
