Usage: the machine is used for packing bottled water, drink, or canned drink into a pack with PE film. Don't need backing board or paper plate when packing; it will save the cost of packing. It is widely used in production of mineral water, pure water, soft drink, beer, juice and so on.

Features:

- 1) Special designed for the full automatic packaging production line of beer, beverage, pure water, fruit juice, dairy products etc.
- 2) With full automatic functions of bottle transfer and arrange, film packing, sealing and cutting, shrinking, cooling and shaping etc.
- 3) Using advanced constant temperature membrane heat binding technology in the world with clear and secure seal.
- 4) The quick seal cooling structure guarantee that the seal has a higher strength even if under high speed production condition.
- 5) Adopt PLC automatic program circulation control with stable and reliable performance.
- 6) The original imported guide bar cylinder guarantee correct operation and durable.
- 7) The inductive switch controls the film transfer system to reliably adjust and control the film transfer length with less loss.
- 8) All the transfer system is controlled by frequency changing devices with stable and smooth transfer speed.
- 9) Unique thermal passage with 2 sets of centrifugal thermal air circulation system that has an equal heat distribution with beautiful and secure shrinkage effect.
- 10) 3 layers of heat insulation treatment with good insulating property, quick temperature rise and energy saving.
- 11) The enhanced cooling shaping passage can quickly turn the packaging membrane into high strength status that is conveniently stored and transported.
- 12) It is easy to change the packaging combination and bottle type to integrate the multi-function into one machine
