

AUTOMATIC INTERNAL & EXTERNAL SCRUBBER

By applying the theory of cylinder, the barrel is turned by 180°. The gears are driven by inverter motor so that the brush conducts automatic 360° brushing for the inside & outside surfaces of the barrel. Automatic water spray realizes the target of washing. PLC programmable control system is arranged. It has applied electric and gas automatic control, all actions are well linked, the function of full automatic barrel brushing is realized. At present, it is most novel and usable equipment in barrel packing production line.

FIVE (THREE) GALLON SHRINK WRAPPING MACHINE

Suitable for the shrink of barneled cap in 5 or 3 Gallon barrel construction of bucket lip filled with 5 or 3 Gallons Water.

Automatic Cork Drawer

Cover stirring machine for drinking water barrel has introduced advanced foreign technique. On the basis of foreign products of same line, we have newly designed and made it, it has applied electric and gas automatic logic control, all actions are well linked, the whole operation is stable and reliable. Full automatic functions of bottle input, cover string, bottle output are realized. It is most novel and usable equipment in barrel packing production line. Main material of Full Automatic Cover Stirring Machine of this co, is stainless steel. Special Material and special technology have been applied for special parts so as to guarantee quality and precision of our products. It has such advantages as perfect property, convenient operation and reasonable structure.
