

4. Main Unit (Rinsing+Filling+Pressing-lid) 3in1 function

Usage: the barreled water filling machine is used for filling mineral water or pure water into the barrels. In one machine, it finishes washing, filling two processes.

Principal characters:

- 1) Adopting turn-over type transportation structure, the bung downward, it is washed with lye, chimerical, clear water, and pure water.
- 2) All the parts contacting the water and other liquid is made of stainless steel, whose surface is polished, easy to clean.
- 3) There are windows on frond and back wall, and one wall on one side can be open, it's convenient to watch, examine, fix and clean.
- 4) Special design of spraying head, spraying well-distributed, good for cleaning with kinds of cleansing liquid.
- 5) Adopting pressure filling, filling quickly, and liquid level stably controlled. All the sealing elements are in keeping with food sanitation standard.
- 6) The whole machine controlled by PLC, working stably and operating easily. Adopting frequency control.

Note :

Due to keeping innovation,
the specification and
Machine pictures or color
are subject to alteration

Main parameters:

- | | |
|----------------------------------|---|
| 1) Production capacity | : 300B/H |
| 2) Material | : 304 Stainless steel |
| 3) Electrical consumption | : 3 KW |
| 4) Pneumatic element | : AIRTACT |
| 5) PLC | : Mitsubishi Japan |
| 6) Electrical element | : DELIXI |
| 7) Filling head | : 2pieces |
| 8) pressure lid part | : chain pressure lid |
| Motor power | : 180W |
| 9) working position distribute : | |
| The first step | : soda inner rinsing (6KW Electrical heating) |
| The second step | : recycle water inner & outer rinsing |
| The third step | : clean water inner rinsing |
| 10) Overall dimension | : 3600*630*1500mm |
| 11) Weight | : 750kg |

5. Cap loader

- 1) Power : 0.18kw
- 2) Material : 304Stainless steel
- 3) Overall size : 3000*200*1500mm
