

FGD SERIES VACUUM FREEZING AND DRYING EQUIPMENT

Brief introduction of FDG series Vacuum Freezing and Drying Equipment

The FDG series vacuum freezing and drying equipment is a piece of new generation food processing equipment researched, developed and produced by our company on the basis of absorbing advanced technology from abroad and combining advantages of products of other same traders in China. It is a new contribution made by our company to serve the food processing industry. In November 2002, our company took the lead in the country in developing the single freezing and drying equipment with a drying area of 280 m². The successful research and development of the equipment has filled the domestic blank of large-scale vacuum freezing and drying equipment. Our customers are spread over many provinces such as Zhejiang, Henan, Yunnan, Shandong, Fujian, Shanxi, Hainan, Hubei etc. The products are also exported to Thailand, Vietnam, and other countries. They are used in such industries as fruits, vegetables, aquatic products, meat products, health products, instant foods, chemical ceramics etc. The FDG series vacuum freezing and drying equipment mainly includes: food pre-freezing system, freezing and tank, heating system, vacuum system, refrigerating system, material conveying system, monitoring system etc.
