The product, an auto assembly line, is used for small round bottle printing, tray forming, feeding in tray, cartoning packing. The structure is compact and convenient operation. It integrates the photoelectron, mechanics, electric and pneumatic, controlled by PLC, driven by servo motor, automatically folds leaflet and finish cartoning packing. It adopts sensor monitoring to coordinate the operation of each section. If any error takes place, it can stop automatically and display the report so as to solve them on time. With advanced detection system, the line can detect and recognize the empty or lack packing tray or lack packing carton to achieve 100% finished product. The tray mould can be made according to customer's requirement.
