Summary

SP-II Model pre-treatment production line for dehydrated vegetable is specially designed for pre-treatment of vegetables before drying. It is mainly composed of cleaning machine, sorting machine, cutting machine, blanching machine, cooling machine, drying machine, blending machine and etc. It can be used for cleaning, sterilization, washing, blanching, color protection, cooling, water filtration and blending of various vegetables. With such features as simple operation,

Reasonable structure, convenient maintenance, wide application, and free combination of temperature and speed adjustment etc., it is a special device of higher automatic degree. In addition to replacing heavy manual work, it also reduces production cost and improves production efficiency, receiving high favor from users. The production line was awarded Zhejiang Provincial Advanced Technology Second Prize and National New Product Prize in 1996.
