

SJIII-K SERIES AUTOMATIC GRANULE PACKING MACHINE

MAIN PARAMETERS:

The SJIII-K series Automatic Granule Packing Machine is designed and manufactured with advanced science and technology in the world. Reliable quality, high efficiency and beautiful shape are its main trait. As regards of its automatic control system, we have adopted advanced photo electricity track planet differential compensating mode and automatically constant-temperature control mechanism, which makes our machine with very fast packing speed. Moreover, our machine can carry out step less speed adjustment, and automatically finish whole packing processes of bag making, computation, filling, sealing, cutting, counting and heat-pressing batch number on the bag. It can be used for various of compound packing materials, which can be sealed after heating.
