

RJWJ-84

emulsification colloid abrader

RJWJ-84 is a lightweight solid jiao ti mo sophisticated equipment, is the factory prototype machine based on the UK were imported from the original design principle of the wet dispersion machine, and its performance has reached international level of similar products.

This machine adopts new grinding wheel relative motion, high-speed rotary mill to a variety of materials, will enable a large number of powder mixing appropriate media (water, oil, etc) for breaking, research foam, fine, suspension, refinement.

This function to provide high-speed, high-quality abrasive products, can be used in pharmaceutical, chemical, ceramics and other industrial and dairy products, chocolate, candy, senior cosmetics, various types of ointment, cream and other products.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

RJWJ-84 technique parameter

Over Dimension	805x335x753(h)(mm)
Machine Weight	70(kg)
Power	3(kw)
Grinding Speed	7400(r/min)
Grinding Diameter	Φ84(mm)

RJWJ-84 production technique speciality

Fineness of material handling up to 5 (single cycle, according to the nature of changes in materials).
