

Model RJWJ-250 production line has following adv-antages

Each system independent control, coordinated accordingly, easy to adjust. Roller die pressing type: Pneumatic pressure pressing, digital display, light and easy. low noise design, there is no noise increase when highest and lowest speed operation. Improved working conditions. Adopts non-oil or micro-oil lubrication, it is easy to alcohol or ether. To prevent the hurt from the capsule, shortened the deying time. For most of the soft capsules no need to clean by alcohol or ether. To prevent the hurt from the solvent to capsules. (excepting the printed soft capsules). Precise gelatin film thickness adjustment, independent film spreading control, it is flexible and suitable to various kinds of gelatin solution and moulds, reaches the max. using rate of gelatin solution.

- Roller die adjustment : Free opposite line design, simplified operation, to prevent operator's mistake.
- wedge lifting type : Elec-driven, and self-lock, safety and dependable.
- material supply pump : Free adjust design, easy install, prevent operator's mistake, all rolling bearing design, prolonged using life.
- Gelatin film cooling : Auto-control water cooling, air blow balance, equipped with machine.
- Capsule fast shape fixing : Special air blow device, reduce the temperature of capsule output part. Easy for the capsule shape fixing.
- Temperature control material hopper: Precise temperature control, auto liquid level control, it is suitable to various kinds of material requirements.

RJWJ-250 technique parameter

Die roll size	150x250(L)mm
Die roll pressure	0.1-0.5Mpa
Output capsule	75000pill/hour(8#ov 5rpm)
Die roll speed	0 - 6rpm
Material feeding quantity	0-2ml
Feeding precision	> 1%
Power	380v 59 Hz 9KW
Weight	1400kg
Over dimension	2110x1000x2000(h)mm
