

Features

- It has been improved the inner design turret, and imports beeline bearings for each machine from Japan directly, so that it can be sure a longer usage-life and precision of machine.
- The working station cam runs under the good lubricating condition, and maintains the inner lubrication of cam slot to a full extent, increasing the pressure pulverization oil pump, thus extends the operation life of the spare parts.
- It is controlled by the computer, has a stepless timing with the frequency-conversion, the numeral showing makes an easy operation and clear appearance.
- The multi-bore dosing brings a precision dosage (it is controlled around $\pm 3.5\%$); The capsule qualified rate is higher than 99%. It can be filled with the Chinese traditional medicine and the Western medicine.
- It has a protector equipment for the operator and the machine. It has an automatic pause equipment when it is lack for the material. It has a steady and safe working, it is the best choice for the hard capsule made factories.
- Add the extra function of Capsule control switch. (Control the capsule outside of the machine: it's more safe and quicker.)
