

Wafer Production Line

Adopting heating-medium conduction technology with heating oil as medium, the plant is a new product developed exclusively in China based on the advanced structure of existing plants from domestic market and abroad. It offers an ideal solution for lower power consumption and overall production cost, and keeping the same surface color for all biscuits. The plant mainly consists of mixing system, automatic feeding system, tunnel-type oven, sheet feeding and cooling device, coating machine, cutter and organic heating medium boiler, etc. With compact structure and unique reliability, the plant is one of the most preferred equipments in foodstuff industry.
