Feature

Our company devoting to the designing and manufacturing the continuous vulcanizing line for rubber fabric conveyor belt and steel wire core belt. The third generation of vulcanizing line is of the international advanced level. So far, more than 30 sets of machines have been manufactured by us for the conveyor belt producers at home and abroad, with the quality being highly evaluated by the specialists. During the course of the development of the vulcanizing line, we devote ourselves to the improvement of the structure and the configuration for the equipment. As a result, our production of vulcanizing line can be used to avoid most of the quality problem in the course of processing, for the special configuration has play an important role in the belt producing.
