CLAMPING SYSTEM

- Clamping force is close between two mold plates ensure the light device and ingenious and movement smoothly.
- Simplification from traditional three-platen or four-platen structure to two-platen structure, which lower the cost of manufacturing and saving the space.
- The technology has applied for state patent the patent number is:200420036250.1
- Easy for mold fixing and exchanging. Easy for taking out finished products.

INJECTION SYSTEM

- Super-large injection device, each single group material capacity can reach 100 liters.
- Adopt advanced closed circuit control technology, ensure the rate accuracy of A,B group component and dye stuff within 2%.
- Multiple stages injection, speed and pressure can be set as necessary.
- Measurement with high precision linear transducer, and high precision mechanical parts ensure measuring accuracy.
