

HYZ- A SERIES

INJECTION SYSTEM

- Low speed and high torque hydraulic motor driving screw directly and suitable for rubber in different viscosity and hardness.
- Two independent oil temperature control system ensure the uniformity of temperature and precision control.
- Multiple stages injection pressure and speed can be set.
- Precise detection of maturing stroke, plasticizing screw decelerate rotating speed before stopped to ensure accuracy.
- Computer control the vulcanizing temperature and time.
- Special function of screw counter revolution easy for material changing and purging.

CLAMPING SYSTEM

- Finite Element Analysis ensure the rigidity of platen and mechanical parts maximize the machine quality and its service life.
- Low pressure mold closing for mold protection.
- Computer control the mold exhaust or vacuum.
- Three-stages speed and pressure setting for mold opening and closing.
- Automatic mold sliding and ejecting device(optimal)

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
