

## ATOZ-series Precision Screw Type

Only German machine can compete with  
EdeX None-Side-Force injection  
mechanism ensures high accuracy  
Makes injection easier,  
more precise and with full-function

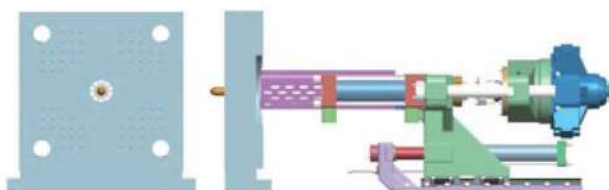

**Note :**  
Due to keeping innovation,  
the specification and  
Machine pictures or color  
are subject to alteration  
without notice!

### None-Side-Force injection mechanism ensures high accuracy

#### Longer injection stroke to make injection volume larger and injection pressure higher.

- 22 threads screw design, all plastic pellets are well melted even with maximum injection volume.
- Only the most precise structure can have the longest injection stroke design. It's the best performance when injection volume is increased and the high injection pressure still existed.

#### No need to turn off injection base when changing barrel

It's available to pull out barrel directly when replacing barrel, it makes the alignment of barrel center is always accurate.
