Performance and Characteristics

This machine applies for non-woven materials it can make many kinds of bags such as vest bags, loop handle bags, flat bags, shoe bags etc. It is equipped with computer touch screen step motor to control the length and photo electricity to track, accurately and steadily. There are control devices like auto-counting alarming, auto-punching etc., which make the finished products well-sealed and nice-cutting with high speed and efficiency. It is an ideal environmental protection bag making equipment.
