

BOPP tape slitting machine (Mesin Gulung & Potong lakban/solasi)

(Back unwind slitting machine)

Applications

1.Applicable for slitting all kinds of Bopp tapes, masking paper, cellophane and others.

Features

- 1.This machine integrates actions of all units as a whole for the centralized control, featuring easy and simple operation.
- 2.Advanced three-step length counting ensures exactness of the rewinding length.
- 3.Taiwan motor with inverter controlling system.
- 4.After rewinding, the slitter will auto run to tab length and begin to turret change over the shaft, improving the product ability.
- 5.Equipped with 48 mm knives separating devices.
- 6.Can stop the tap in a minute when being parked so as to ensure the accurate length.
- 7.The slitting knife is provided with the industrial blade.

Technical parameters

1. Slitting width:1.3m
2. Max diameter of material: Dia 650mm
3. Max rewinding diameter for 4 shaft exchange
4. Min, Cutting diameter: 10mm
5. Paper core of inside diameter: Dia 3"paper core
6. Machine Speed: 0 to 180m/min
