

RDM HopperDryer

The Characters of The Machinne

- Polished appearance with stain-less steel hopper.
- Hot wind extending device in high efficiency, the not wind are distributed evenly, can promote the drying efficiency.
- Special hot-air winding pipe design, guarantee wind sending in a smooth going way, its benefit to maintenance.
- Interl parts are made of stainless steel.
- As the hopper body and the bottom are designed separately, there-fore it is very convenient to clean.
- Overheat protection device.
- Main switch for safety purpose. Transparent eye-glass magnet plinth.

Note:
 * is standard allocation, * is selection purchase.
 There are some small difference in quantity due to the different density of various plastics.
 The machine voltage specification is 30 380V, 50Hz.
 The voltage can be changed as you require.

Note :
 Due to keeping innovation,
 the specification and
 Machine pictures or color
 are subject to alteration
 without notice!

RDM series dryer is a quick-drying machine for plastic and rubber raw material drying, it can dry the humidified raw material caused by packing, transportation and retrieving. The direct-type bunker is especially suitable for installed on the plastic-rubber injection molding machinery carrying out drying. All the types of machines, the 24-hours timer are available.
