

CHX Series

Plastic Injection Molding Machine

**Note :**

Due to keeping innovation,
the specification and
Machine pictures or color
are subject to alteration
without notice!

This type of machine applies already matured electronic and power control techniques by which the pump motor frequency is adjusted per the specific pressure and flow required in the related machine operation so as to realize maximal match of motor driving power with machine output as to realize instant startup of machine from zero speed, which enables complete control of actual power consumption of the injection molding machine and to approach in the real meaning save of power (energy) so as to help customers enhance acquire better investment refund. Marketing competence and
