

RHD series of honeycomb dehumidifier, together with RDM series of hopper dryer, are used to dry hygroscopic engineer plastics such as PA, PC, PBT, PET etc with high efficiency. They can connect directly with molding machine or centralized dry material.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

THE CHARACTER OF THE MACHINE

- > Adopted P.I.D. temperature controller, the equipment can show on screen set temperature and actual temperature.
- > Up-to-date chain-wheel transmission design with more stable performance, to avoid traditional belt's disadvantage under high temperature.
- > Double condensers structure to ensure lower return air temperature and dew point.
- > The dew point of processing wind can reach -40 , A better honeycomb is optional to use so as to make dew point reach -50 .
- > A dew point gauge is optional to use in order to monitor dehumidifying effect anytime.
- > Novel design, nice appearance, easy to move.
