

ALUMINIUM-PLASTIC COMPLEX PIPE PRODUCTION LINE

Application & suitable scale:

The line is used in producing aluminum-plastic compound pipe material. The aluminum pipe adopts ultrasonic welding and common-extruding one-step shaped. This pipe is widely used for conveying gas and liquid, such as cold and hot tap water, all kinds of acid and alkali salt solutions, gas, oxygen and compressed air etc.

Main technical parameter

Produced Pipe Specification	$\phi 16 - \phi 32\text{mm}$	$\phi 40 - \phi 63$
thickness of aluminium belt	0.2-1mm	
Production Line Speed	3.5-11m/min	
Annual out-put per set of machine	1-3.5millions of meters(100-350万)
