PE CARBON SPIRAL REINFORCING PIPE PRODUCTION LINE

Application:

The unit is mainly used in producing polythene screw-thread bellows. The bellows are mainly used in the case shell protection of cable, transfer line, gas pipeline for industry and civil use.

- ◆ All kinds of polyolefine material, multi-layers spiral strengthening pipe can be co-extruded for various uses, recycle material can be used in production;
- ◆ Optimum spiral copper sizing sleeve, its entrance carrying pre-cooling and powerful vacuum device to suit for high speed extruding pipe.
- ◆ Stainless steel cooling water trough is three-dimensional regulation, longitudinal move by motor. High efficient cooling comes from peculiar spraying nozzle and high efficiency water pump.
