Characteristics and applications

- Applicability of FC Boards: Magic decorations of parks and game houses, corridors and booths in rest areas; internal and external decorations of commercial buildings, curtain walls of modern building, aviation-used transparent containers, motorcycle front windshields, shields of airplanes, trains, steamships, automobiles, steamers, underwater ships, etc.; telephone booths, advertising guideboards, electric spectacles, exhibition arrangements; barriers of expressways and urban bridge roads.
- Applicability of PMMA Plates (Acrylic Plates): They have extensive application in instrument and meter parts, lighting instruments, decorations, building materials, planes and auto parts, medical appliances, craftworks, electric appliance insulating materials, specimens, tablets and various articles for light industry, culture and education, and life.
- Applicability of Bathtub Plates: By coextrusion lamination of PMMA-ABS, bathtub plates not only keep the surface gloss of acrylic boards but also own the shockproof performance of ABS plates. They have widespread use in bathing products such as bathtubs, shower rooms, steam houses, etc.
- Applicability of ABS, HIPS Refrigerator Boards: They can be applied as internal bladders of refrigerators, cores of doors, drawers and defrosting pans.
- Applicability of PS Conducting Strips: they are mainly applied in semiconductors, electronic and computer products, especially as packaging materials of the fittings and equipment requiring dustlessness, no static electricity, discharge protection, shield of electromagnetic wave/radio frequency interference.
