

HPC660-1400

HPC600-1400 SERIES PLASTIC SHEET EXTRUDER MACHINE

Feature :

1. The machine is used to process granular plastic into sheet material, through the processing of heating, extruding and rolling.
2. The max diameter of screw, easy to make sheet thickness evenly.
3. Change the filter by the advantage non-stopping hydraulic controlling way, heighten the efficiency working.
4. Roller controlled by cam, make the high accuracy precision. Super mirror pressing roller make the surface temperature evenly, then make the finished sheet with high transparent and thickness.
5. The sheet to be used of thermoforming machine, which can make drinking cup, jelly cup, instant rice-box, instant noodle bowl, food-box, stationery plate and plastic enclosing wall, etc.
