

PP-R/PERT/PE PIPE PRODUCTION LINE

Characteristic

The line is mainly used in producing pipe with PP-R resin materials also used in PB PPC PE resin pipe material production line.

Application

PLC control, high degree of automation.

Adopting special screw, good effect.

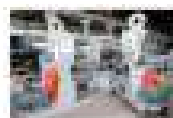

Adopting compound spiral engine head, effectively deleting memory function of the material.

Vacuum shaping, constant temperature control, eliminating pipe stress.

Adopting coextrusion head to improve the tube with color line.

Heavy extrusion volume, low temperature of melt equal temperatur of melt.

Extensive material process range.

Main Techninacal Parameter

Model	Pipe Range (mm)	Extruder	Max. Output (kg/h)	Total power (kW)	Line lenght (m)
PP-R-63	Φ16 - Φ63	SJ65/30 SJ/25/25	100	75	32
PP-R-110	Φ50 - Φ110	SJ90/30 SJ/25/25	200	145	35
PP-R-160	Φ75 - Φ160	SJ90/30 SJ/25/25	220	180	35

Note :
Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
