Function and structure

It adopts imported high-quality tool steel, special cutting-tool. It is specially durable. The installation of the cutting tool can be adjusted. The cutting tool can be sharpened again. Its use life is very long.

The moving cutting knife stand is a step designing to make cutting force resolve and increase the cutting force times.

The material of the moving cutting knife stand is T7A high-quality tool steel. Its hardness and softness is reasonable. It is not easily broken or worn. It adopts high-strength steel screw(8.8 grade) to fix it. The structure is firm and durable.

The main body is Q235A thick-wall high-quality steel to avoid that the machine is used for a long time and affect its mechanical performance.
