XQY 3 - 10**TECHNOLOGY DESCRIPTION**

1. Simple structure; small occupying area; stable and reliable function and convenient maintaining; Simple manual operation enables the workers to learn fast; This machine combines many functions into one with low consumption.
2. It is adopting with multi-valves in series, electricity discharging unit and compressing and vibrating organic combining unit to materialize the highest molding and density of the finished products.
3. Auto pallets conveying, pallets feeding and compulsive materials arranging have highly raised up the production efficiency and reduced the working intensity, while simple pallet conveying and feeding units can be installed for production.
4. This machine is combining multi functions into one with material feeding in twice times; Standard block, hollow block, road surface block (including colored block), small pathway block can be all materialized by this machine, which is widely used.

TECHNOLOGY PARAMETER

Main Machine Overall size (LxWxH mm)	3500 x 1000 x 2480mm
Pallet Size (L xWxH mm)	680 x 535 x 20mm
Molding Periodicity (differs from the different products)	15-30 seconds
Machine Power	16kW
Machine Weight	~4 t
Molding bricks quantity	Standard block 20pcs/ mold
	Eight-hole block 10pcs/ mold
	Hollow block 3pcs/ mold
