|                               |                                                                                                                   |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Rated power factor            | : 0.8(lagging):380-415V 50Hz, 380-480V 60Hz.                                                                      |
| Power output                  | : SV series is continuous power with ability of running at 10% over load 1 hour in 12 hour conforming to ISO8528. |
| Operating conditions          | : conform to GB 1105 and ISO3046 standard.                                                                        |
| Eight electricity performance | : conform to GB 2820.1~6-97 standard.                                                                             |
| Mode of voltage adjustment    | : Auto. Mode of starting : Electricity.                                                                           |
