

Preset Cut Off Length

-A Graduated rule is attached on cross cut fence for reading the length being cut. It is combined with a swing stop for cutting identical length in mass production.

- Quick action lever locks setting securely.
- Universal ball table (front) standard.

EASY CONTROL RIP FENCE

Rip fence may be micrometric adjusted, permitting fence to be locked rigidly and accurately parallel to the cutting track.

Design Features :

- Precision ground guide rod. Made from medium carbon steel, coated with hard chrome, to provide smooth and accurate travel.
- Vertical and lateral adjustment of scoring saw blade permits clean burrs.
- Saw unit feed has 3 speed adjustment and the return is accomplished in rapid traverse.
- Heavy gauge base frame and table rest are welded from cold rolling steel plate offers rugged construction.
- "Follow-up" type dust collector system accrues high efficiency for collection.
- Guide rod fitted with PU board to wipe off cut efficiently.
- Fast and convenient length adjustment with micrometric adjustment ranging from 35 to 1,200 mm.
