

PVF Series Impact Crusher Introduction

PFV series impact crusher is a new triple-chamber crushing equipment, which is optimal designed by adsorbing the international advanced technology. This series has big cavity, high crushing efficiency, and it can crush various coarse, medium, fine materials with size below 500mm, and compressive strength below 360Mpa. Besides, it has wide range of adjustable size, and the product is cubical, fine and even, it is the ideal equipment for industries with high demands of stone shape, such as highway, railway, airport and water conservancy project, etc.
