

The different between SS-160E and SS-160AE,SS-160GE

- 1) Construction for SS-160E is stronger and better, it is about 100kgs different
- 2) Direct dust chute outlet for efficient dust collection
- 3) The stand with concrete to make the machine stable and good for heavy cutting
- 4) Main saw blade spindle has been improved to heavy duty one
- 5) Cast iron table is bigger (SS-160 548x896mm, ss-160 GE 400x830mm)
- 6) The main saw blade could be used 50 mm more, max main saw blade is 355mm instead of 305mm (cutting height 25 mm more)
- 7) Cast iron hand wheel for smooth adjustment and tilting indicator in front of machine for easy readout

Cast iron wheel for smooth operation, the scale is easy readout for operator

Good outlook, stronger, large cast iron table

Frame is smaller, light duty (SS-160AE and GE)
