

EXTRA LENGTH OF HYDRAULIC CLAMP CARRIER

CC-16-12
(max working length = 4.6 mm)
(max working depth = 44")

Machine is equipped with two gear reducer sets: motors of both sides have inverter control of innovative design, that makes the machines more stable and expandable

**CLAMP CARRIER MAX. WORKING LENGTH IS 4.6M or 5M.
SPECIALIZED IN FINGER-JOINT PIECES LAMINATING**

- * The machine is equipped with two sets of hydraulic operated clamp tighteners, providing extremely powerful, uniform and clamping performance
- * Clamping force is adjustable to suit various types of workpiece
- * Each tightener is driven by an independent hydraulic system made of high quality components, which ensure long service life

Heavy duty worm reducer insures controlled indexing, even when rotating an unbalance load. The caterpillar chain for rotation feeding is heavy-duty and stable.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
