

PNEUMATIC & HYDRAULIC CLAMP CARRIER (SEMI-AUTO TYPE)

- * This models is the most versatile and reliable edge-gluing machine available in the word working industry today. Model CC-20-8, pictured here, is equipped with 20 section, 8 clamps each section
- * Choice of 12,16,20,30,40 section on the Caterpillar Chain drive series are available.
- * Choices of clamps on each section
- * Working thickness capacity: 3/5"~4" (max 6" for optional)
- * If thickness is less than 3/4", the separate hold down frays as option to prevent the board become warped
- * A caterpillar type chain drives sections(for models with over 12 section only)
Available on both Automatic and semi-automatic models, for choice
- * Pneumatic operated clamp tightener provides rapid tightening and loosening of clamps. Hydraulic clamps tightener is optional
- * Individual clamps can be moved to adjust the distance between two clamps
- * Panel flattener is actuated by air cylinder. When clamps are tightened, the panel flattener is applied to hold the work piece horizontal, providing a highly flat panel
- * All parts are ruggedly constructed for maximum stability and non-brittle rigidity
- * Foot switch control for operational convenience
