

MULTIPLE SPINDLE OSCILLATION MORTISER LMM-612

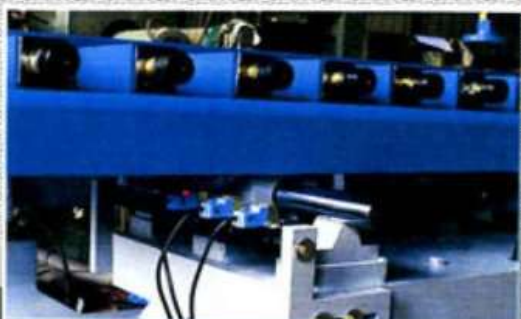

HYDRAULIC SYSTEM

The specially designed hydraulic system provides maximum stability of mortising operations and upgrades production quality.

PRECISION SLIDEWAYS

The spindle move on the dust proof, precision linear motion guides, ensuring maximum straightness accuracy of mortises.

HIGH LOW FEED SPEEDS

The hydraulic system permits high low speed change to suit various hardness of wood materials, ensuring excellent mortise quality.

ADJUSTABLE MORTISE WIDTH

The mortise width adjustment can be read on the scale for accurate adjustment.
