

Vertical Single Line Boring Machine HS-A21

FEATURES :

- Convenient detachable machine frame assures durability.
- Down feed boring operations. Changeable spindles make it convenient to drill hinge holes.
- Mechanical digital read-out allows for accurate and consistent depth setting without scratching on the panel surface.
- Convenient operation is made by simply pressing on a foot switch. Easy to maintain.
- Motor starts only when in boring stroke to extend service life, save on power consumption and reduce noise.
- Fence and stop are quickly set to the desired size.
- A speed stabilizer is available, providing smooth feeding against the workpiece.
- Quickly chuck to provide convenient fitting and dismantling for boring bits. Attached with 1/3 pcs as standard.

SPECIFICATION

MODEL	HS-A21
Motor	2.5HP
Table size	510x1200mm(20"x28")
Max. drilling depth	80mm
Max. Distance between centers	32mm
Compressed air required	6-8kg/cm2
Number of spindle per boring head	21
N.W/G.W	150/200kgs
Machine	1200x700x1520mm
Packing Size	1500x838x1778mm
