

Steel brush fully mounted type

To enhance the wood grain and vision wood age by using steel brush to scratch the surface of wood piece
The steel brush is for fully mounted type, because have to very strong to working and keep a long life time
And we find the effect is better than steel brush strip type
For the steel brush fully mounted type of planted are : closed type

ABRASIVE NYLON BRUSH

This type the overall height of brush will shorter and shorter after start to working

Available in a variety of grits. For different surface, its roughness range from grit #60, #80, #100, #120, #150, #180, #240, #320, #400 GRIT

Because different wood and requirement will to influence the life time, basically for our customer experience of sanding, take around can using 400~800 hours.
