

PRY-D Series Roll Laminating Machine

Introduction

The roll laminating machine is your best choice for its grace appearance, high efficiency, simple operation and low price.

- Utility: laminating film to color pages, documents, charts, drawings, and indoor advertising products.
- Simple: automatic running and easy operation.
- Shortcut: Speed range from 0 to 1.5m/min
- Economy: inexpensive high-quality new environment-friendly coating materials.
- Versatile: suitable for different thickness laminating film (matte film, gloss film), hot and cold laminating, thermal and mounting plate.

Features

1. Small occupation, high degree automation;
2. Patent for automatic paper feeding, improve operation speed;
3. Patent for quick self-hold and side position;
4. Digital speed setting;
5. Patent for digital controlling distance between the paper ends;
6. Automatic stop when there is no paper during the operation;
7. Patent for anti-curl ensure laminated and sheeted product smooth surface;
8. Setting film's sheeting position and width to leave unnecessary film on the roller.
9. Collecting table can be set according to practical needs.
10. LCD display.
11. Gear type pressure setting structure meets the different demand of laminating pressure.
12. Film hob ensures the continuous feeding to realize operation of manual tearing or automatic sheeting.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
