A choice of three operating modes ensure maximum versatility

1. Platen Up – the sanders function as a contact roller sander only when calibrated with 36 to 100 grit belts.
2. Roller and platen both down- intermediated and final finishing in one pass with 100 to 180 grit belt.
3. Platen down – final finish with 220 to 320 grit belt of lacquer sanding with 400 to 600 grit belt.
